## How to Build and Rebuild Successfully

Start out with what life gives you. Some of us have small beginnings, like a simple brick. You may wonder, "Is this all there is to life?"

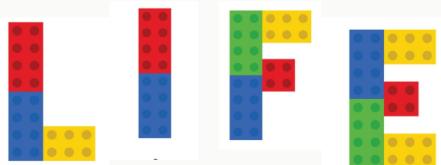

Some people like to use others as stepping stones to greater things.

Have you ever stepped on or been stepped on in the ladder of life? Do you feel like you just need one more thing or one promotion to make it all better?

## How to Build and Rebuild Successfully

No matter how high you may climb the ladder, does it still feel like something's missing inside? Do you know that the founder of the first Lego brick suffered great losses? His name was Ole Kirk Kristiansen, a toymaker who believed in quality work and perseverance.

Ole lost his home and factory to a fire, and tragically lost his wife. Yet his vision survived even the depression. How did Ole remain standing? Ole was a Christian who stood firmly on the foundation of Christ. A foundation is like a Lego baseplate, a big piece that you can build other things on.

Your life started with a single cell, a building block. That cell carried the instructions to build trillions of other cells of all kinds, until it made you.

Because we live in a fallen world, our plans, our things, our lives tend to fall apart.

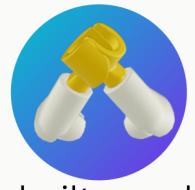

There is a special piece that fits in our hearts to make us whole again.

Jesus was broken in our place, even giving His life for us.

for us. The Bible says "all things were made" through Jesus, the Master Builder, and He likes to think big. He made you, and right now He's building a huge place in Heaven for all who accept His offer. Just pray:

Dear God,

I admit I am a sinner. I have built my life with the wrong bricks and stepped on others. You are the Master Builder of my life.

Help me get unstuck from where I am and give me a new baseplate. I believe that Jesus died for me and took my place of brokenness.

I accept His offer to build anew and continue building forever. Help me to find a good church where others are sticking to the same baseplate. In Jesus name, Amen.
